# Aqueous-Based Rust Inhibitor

## OW 333

**OW 333 is an aqueous-based rust inhibitor designed for use in the final stage of a conveyor type parts washing process. OW 333 can also be used in dip tank applications. OW 333 effectively inhibits corrosion on steel parts when used at concentrations higher than 5%. It is suggested that the tank be checked on a daily basis to maintain a concentration greater than 5%.**

**OW 333 contains additives to inhibit the formations of fungus and bacteria. Additionally, OW 333 contains wetting and dispersing agents which assist in coating the part to improve corrosion resistance. A titration chart is available upon request.**

**Consult your One Way Products, Inc. field technician for additional use instructions.**

### Refractometer:

<u>4%</u>	<u>6%</u>	<u>8%</u>	<u>12%</u>
1	1.75	2	4

Physical Appearance	Clear solution
Odor	Mild
pH	9.6 Neat
Specific Gravity	1.04
Solubility in Water	Complete
HMIS	1,0,0, B
Incompatibility	Oxidizers, Acids
